

Theoretical Knowledge Airline Transport Pilot License (A) Distance Learning

أكاديمية الفجيرة للطيران
FUJAIRAH AVIATION ACADEMY

BROCHURE

“THE BEST SAFETY DEVICE
IN ANY AIRCRAFT IS A
WELL-TRAINED PILOT”

OVERVIEW

Are you considering taking your Flight Training one step further towards professional flight qualifications?

We are specialized in providing ATPL distance learning courses approved by GCAA. The program is based on the well-known Bristol Ground School methods for PPL and CPL/IR holders and is distributed in distance learning, class room instructions and examinations.

REQUIREMENTS FOR COURSE ENROLLMENT

- ✈ The applicant shall hold at least an ICAO PPL
- ✈ The applicant must have sufficient knowledge of Mathematics and Physics to facilitate an understanding of the content of the course.
- ✈ All candidates shall have attained a minimum level 4 (four) in English Language Proficiency (ELP).

COURSE DURATION

The average student typically takes four to six months to complete the distance learning for PPL holder and three months for CPL/IR holder.

IMPORTANT NOTE

Upon registration the students are required to appear on the scheduled refresher course for Module 1&2 within 12 months. Failing to attend the said refresher course the student will be required to re-enroll again.

All GCAA exams are to be passed within 18 months from your first GCAA exam sitting. Furthermore, you will be provided with access to ATP Digital which has no validity. Access to Bristol Ground school online question bank is valid for one year. Thereafter, it has to be renewed at personal expense.

TRAINING PROGRAM

A particular advantage of distance learning is that you can work at your own pace. As such, it is ideal for individuals who are working full-time and cannot afford to spare enough time to attend classes regularly. Each Course/module is conducted in two phases:

- Home study E Learning phase
- Classroom instruction in Fujairah Aviation Academy phase

A. For PPL HOLDERS

The course is 650hrs (500hrs distance learning and 100hrs class room and 14 exams)
The class room hours are divided into two modules and each module contains the following subjects:

MODULE 1

Module 1 contains 8 Subjects

- Meteorology
- General Navigation
- Human Performance
- Instrumentation
- Flight Planning
- Mass and Balance
- VFR Communications
- FR Communications

MODULE 2

Module 2 contains 6 Subjects

- Radio Navigation
- Aircraft General Knowledge
- Aviation Law
- Operational Procedures
- Principles of Flight
- Performance

Student will start the online study for ATPL DL Module 1 and once he/she is done and completed the entire progress test, he/she is eligible to start with the classroom instruction, internal and GCAA exam in Fujairah Aviation Academy for 13 working days. Once he/she completed the module one and passes all the examinations, student can immediately start with the Module 2 online study and the process will be the same as the Module 1 and classroom instruction duration will be 10 working days.

B. For ICAO CPL IR HOLDERS

The course is 250hrs (220hrs distance learning and 30hrs class room followed by 14 exams in above subjects except for GCAA CPL/IR holders who are exempted from VFR & IFR Communication). Student will start the online study and once he/she is done and completed the entire progress test, he/she is eligible to start with the classroom instruction revision in Fujairah Aviation Academy for 5 working days. The schedule of the exams is based on the student readiness.

Notes:- Please note that student must pass all exams within 18 months of your first exam sitting

ATPL MANUALS

The manuals form a major part of the Learning System. The course is broken down subject by subject and chapter by chapter into easily understood sections supplemented with thousands of diagrams, all produced in house. Bullet points in the margins emphasize important facts. Progress Tests have been inserted after each major section. These are presented in multi-choice format and the questions are either based on exam feedback or in the style of the GCAA exams. Seventy-four tests in all need to be completed and returned to us for marking and assessment. These can be completed in hard copy and returned either through the mail or by fax or, alternatively, the tests can be completed on the computer program with the results being electronically transmitted. The manuals are printed in full color on high quality paper.

They are presented in seven ring loose leaf binders with a single binder containing from one to three subjects. The students are provided with an electronic copy of all study material and amendments to the manuals are accessed through the internet by selecting 'Download Page' in the computer program.

The COMPUTER PROGRAM

The computer program provided with the course also contains all the text and diagrams you will find in the ATPL manuals. Many of the static diagrams from the manuals are animated to illustrate particular points.

The program also contains a series of longer extra animated training modules and video sequences, holds electronic versions of the progress tests and gives access to the on-line question bank, forum and download page. Some of the main features of the computerized part of the Integrated Learning System are:

- It contains animated diagrams and video sequences to help you understand how various components and systems work.
- It allows you quickly to find information on specific topics using the phrase finder.
- It tests your knowledge with a series of progress tests and sends your test results back to the school. The progress tests in the Learning System are the same as those contained in the written notes.
- It automatically marks and scores the tests you take.
- It gives you feedback on wrong answers and allows you to refer directly back to the appropriate section and chapter in the main text.
- It tracks and records your responses to questions allowing you to see at a glance which questions you got wrong or hesitated over.
- It allows you to compile your own set of abbreviated notes by cutting and pasting selected portions of text from the manual.

COMPUTER BASE TRAINING

The computer program normally displays text and images side by side. The images refresh automatically as you scroll down through the text. You can choose to view text alone or expand the current image to take a closer look. Most of the images are vector drawn and can be enlarged as much as you wish. Words highlighted in red are defined terms. When these are clicked with the mouse a pop-up window appears showing the full definition for the word. Additional buttons allow you to bookmark the page for later reference.

FINDING A TOPIC

The program is designed to help you find information quickly and easily. The computer program is divided by subject then by chapter in just the same way as the written manuals. The sub-headings within each chapter divide the program into pages. The program opens at the Main Contents page which lists the major subject areas on the right with chapter headings and page titles displayed on the left. Click on a page to navigate straight to it.

THE PHRASE FINDER

If you are not certain which subject and chapter holds the information you case use the phrase finder. From anywhere in the application select 'FIND' on the toolbar, then type in the word or phrase you are looking for the phrase finder rapidly searches through the entire course and displays the number of every page where the word or phrase occurs. Click on the page name to jump straight to your selected topic area. If you need to continue the search click 'Find on Page' for every occurrence on that page.

PROGRESS TESTS

At the end of each lesson is a short quiz containing between two and fifteen questions. Progress tests are inserted at intervals, usually after each group of three to five lessons. These tests can be taken any number of times and the sequence of questions and answers is randomized each time. Each time a test is scored, the program stores the result so that you can automatically transmit it to us over the internet.

TEST REPORT

Once the test is scored, the Learning System identifies which questions you got wrong and produces a written test report that shows each question in turn with the correct answer and your answer. Detailed explanations can also be shown on screen and hot links refer you back to the relevant sections of text.

REVIEW PROBLEM QUESTIONS

The program keeps a record of every question you answered incorrectly or even hesitated over. This allows you to revise specific problem areas and jump directly to the questions you got wrong rather than requiring you to take the whole test again.

REVISION COURSES

Each module ends with a one week classroom phase. These are held several times a year in Fujairah Aviation Academy and are usually timed to occur immediately before each exam phase. Prior to attending the brush-up, you must have passed (and submitted electronically) all your lessons and progress tests to your school.

The classroom phase is very intensive. Much of the time is spent working through practice papers and debriefing your results so there is very little time to cover new material. To get the best out of the classroom phases you must have completed and thoroughly revised your self-study material.

PPL Holder

AED 23,000/-

(AED Twenty-Three Thousand Only) The Fees are exclusive of UAE-VAT which will be charged additionally

CPL/IR Holder

AED 18,000/-

(AED Twenty-Three Thousand Only) The Fees are exclusive of UAE-VAT which will be charged additionally

COURSE FEES INCLUDE:

Theoretical Knowledge (Distance learning and Classroom instruction).	✓
ATPL DL E-learning software.	✓
Soft copy Book.	✓
Email and Phone support.	✓
3 CAPs (CAP 696, 697, 698).	✓
Jeppessen route manual.	✓
FujAA internal exams fees (two attempts for each subject).	✓
GCAA exam fees (one attempt for each subject).	✓

PAYMENT SCHEDULE

Full payment has to be made at time of enrollment

Notes:- All Payments are Non-Refundable.
